Highly motivated transitioning Special Operations service member, with active Secret clearance. Currently, I am enrolled in the Washington Vets to Tech (WaV2T) program, specializing in Cloud Application Development, with an anticipated completion date in August 2024. This program grants 18 college credits toward a bachelor's degree in computer science. My studies encompass programming languages such as Java, JavaScript, Python, HTML5, SQL, Linux OS, and AWS Cloud Practitioner Certification.

Actively seeking career opportunities in Cloud/Application Development, Software Engineering, Data Analyst, and customer support roles. Bringing a solution-focused mindset, exceptional leadership skills, and a collaborative approach to teamwork. Working with foreign national units in multiple countries helped me hone these skills over the last five years. I am eager to find a company that fosters continuous growth and can provide an environment to contribute and learn over the long term.
